

Contents

1	Introduction	1
2	What's new in Windows Vista and not discussed in this book	3
2.1	A summary of some new features not discussed in this book	4
2.2	Windows Vista Versions	6
2.3	Using Multiple Languages or changing the System Language.....	8
2.4	SuperFetch and ReadyBoost.....	9
2.4.1	SuperFetch	9
2.4.2	ReadyBoost	9
2.5	32- or 64-bit Windows Vista	11
3	Deploying Windows Vista	13
3.1	Vista Product Activation	14
3.1.1	License states	14
3.1.2	Retail Activation	16
3.1.3	OEM Activation	16
3.1.4	Volume Activation 2.0	17
3.1.5	Multiple Activation Key.....	17
3.1.6	Key Management Server (KMS).....	18
3.1.7	Licensing overview	21
3.2	Windows Image Management	22
3.2.1	ImageX.....	23
3.3	Automating Windows Setup.....	30
3.3.1	Windows Vista answer files	30
3.3.2	Catalog Files.....	30
3.3.3	Windows System Image Manager.....	31
3.3.4	Common WSIM scenarios	35
3.3.5	Using the unattend file	39
3.3.6	Unattended setup	41

3.3.7	Sensitive Data in Answer Files	44
3.3.8	Troubleshooting Unattended Setup	45
3.4	Offline Servicing of Windows.....	48
3.4.1	Package Manager	48
3.4.2	Enabling or disabling Windows Features.....	49
3.4.3	Adding a language pack to an offline image.....	50
3.4.4	Offline Driver Injection.....	51
3.5	Windows Pre-boot Environment	53
3.5.1	What does Windows PE do and what not	53
3.5.2	Windows PE architecture and system requirements.....	54
3.5.3	Windows PE boot process.....	55
3.5.4	Building a Windows PE image	56
3.5.5	Adding a network driver to a running Windows PE instance	57
3.5.6	Booting Windows PE from a USB stick or CD ROM	58
3.5.7	Booting a locally stored WIM file.....	59
3.6	Components in a running Windows Image.....	61
3.6.1	Driver management	61
3.6.2	Using a share as a source for device drivers.....	61
3.6.3	OCSetup	62
3.7	Windows Deployment Services.....	63
3.7.1	What's new in Windows Deployment Services	63
3.7.2	Prerequisites for running WDS	63
3.7.3	Installing Windows Deployment Services	63
3.7.4	WDS Modes	64
3.7.5	WDS image types.....	65
3.7.6	Configuring Windows Deployment Server	65
3.8	Boot Configuration Data (BCD).....	71
3.8.1	How to modify BCD	71
3.8.2	Using BCDEDIT	72

3.9	Microsoft Deployment Toolkit.....	77
3.9.1	Building a Microsoft Deployment Toolkit development lab.....	77
3.9.2	Installing Microsoft Deployment Toolkit.....	78
3.9.3	Using Microsoft Deployment Toolkit.....	78
4	Managing Windows Vista.....	85
4.1	WinRM.....	85
4.1.1	Configuring WinRM.....	85
4.1.2	Using WinRM for remote console.....	86
4.1.3	Using WinRM for systems management.....	87
4.2	Event Viewer.....	89
4.2.1	The new event viewer UI.....	89
4.2.2	Custom Views.....	90
4.2.3	Using events to trigger actions.....	91
4.2.4	Event forwarding.....	92
4.3	Task Scheduler.....	95
4.3.1	What's new in the Task Scheduler.....	95
4.3.2	Pulling the trigger.....	95
4.3.3	Redefining the action.....	97
4.3.4	Scripting the Task Scheduler.....	99
4.4	Group Policy.....	101
4.4.1	What's new in Group Policy.....	101
4.4.2	New Group Policy Categories.....	103
4.4.3	Group Policy Templates.....	103
4.4.4	Group Policy Preferences.....	105
4.4.5	Troubleshooting Group Policy.....	106
4.5	Print Management.....	113
4.5.1	Security requirements.....	113
4.5.2	Print Management.....	113
4.5.3	Group Policy to configure printer connections.....	118

4.6	Backup/Restore.....	120
4.6.2	File Backup and Restore	120
4.6.3	Complete PC Backup and Restore	123
4.6.4	Shadow Copy or Previous Versions	125
4.6.5	System Protection.....	126
4.7	Reliability and Performance snap-in	130
4.7.1	Resource Overview	130
4.7.2	Performance Monitor	130
4.7.3	Reliability Monitor.....	131
4.8	Windows Recovery Environment (WinRE)	133
4.9	Remote Desktop and Remote Assistance	137
4.9.1	What's new in Remote Desktop.....	137
4.9.2	Remote Desktop Client 6.x	139
4.9.3	Remote Assistance	142
5	Securing Windows Vista.....	147
5.1	User Account Control.....	147
5.1.1	The security triangle.....	147
5.1.2	What is UAC about?	148
5.1.3	What does UAC strip from the access token?	149
5.1.4	When does the Consent UI kick in?	153
5.1.5	UAC Group Policy options	154
5.2	File and Registry Virtualization.....	156
5.2.1	What is File and Registry virtualization?	156
5.2.2	When do files and registry entries get virtualized	157
5.2.3	How File virtualization works.....	157
5.2.4	How Registry virtualization works.....	159
5.2.5	Investigating Virtualization.....	160
5.2.6	Possible issues with File and Registry Virtualization	161
5.2.7	Controlling File and Registry Virtualization using Group Policy ...	162

5.3	Internet Explorer in Protected Mode	163
5.3.1	Windows Integrity control and Internet Explorer Protected Mode	163
5.3.2	User Account Control and Internet Explorer Protected Mode	164
5.3.3	IE User Interface Privilege Isolation	165
5.3.4	Internet Explorer Compatibility Layer	165
5.4	Session 0 isolation	167
5.5	File System Security	168
5.5.1	Owner ACL	168
5.5.2	TrustedInstaller	170
5.5.3	What happened to the Documents and Settings folder?	172
5.6	BitLocker	174
5.6.1	BitLocker pre-requisites	174
5.6.2	Limitations of BitLocker	175
5.6.3	How BitLocker works	176
5.6.4	BitLocker key scenarios	177
5.6.5	Key recovery and management	178
5.6.6	Storing BitLocker recovery information in Active Directory	179
5.6.7	Installing BitLocker	182
5.6.8	Managing BitLocker	186
5.7	Removable Device Control	188
5.7.1	Device identification	188
5.7.2	The Device identification process	189
5.7.3	Restricting Device Installation	191
5.7.4	Device driver installation by non-admins.....	193
5.7.5	Controlling Removable Storage Access.....	193
6	Windows Vista Networking	197
6.1	The new stack	198
6.2	Performance enhancements	199
6.3	Network Discovery.....	201

6.3.1	Link Layer Topology Discovery	201
6.3.2	Web Services for Devices and Function Discovery	202
6.3.3	Protocols used for Network Discovery.....	203
6.4	Network Location Awareness.....	204
6.4.1	Manually selected network locations	204
6.4.2	Location types	206
6.5	IPv6	208
6.5.1	IPv6 Addressing	208
6.5.2	Disabling IPv6 components	209
6.6	Name Resolution	211
6.6.1	Link-Local Multicast Name Resolution (LLMNR).....	211
6.6.2	Peer Name Resolution Protocol (PNRP).....	212
6.7	Wireless Networks.....	215
6.7.1	Managing Wireless Networks with Group Policy.....	215
6.7.2	Managing Wireless Networks from the Command-Line.....	216
6.8	IPSec.....	218
6.8.1	New functionality for IPSec.....	218
6.8.2	IPSec Authentication.....	219
6.8.3	Cryptographic Algorithms for IPSec.....	221
6.9	VPN and Dial-up networks.....	223
6.9.1	Tunneling Protocols	223
6.9.2	VPN data integrity and encryption algorithms	223
6.9.3	VPN tunnel setup using IPv4 or IPv6	224
6.10	Policy-based QoS	225
6.11	Windows Firewall with advanced security.....	227
6.11.1	What's new in Windows Vista Firewall	227
6.11.2	Configuring Windows Firewall with Advanced Security	230
6.11.3	Managing Windows Firewall from the command-line	238
6.12	Exempt network technology	239

7	Windows Vista Mobility	241
7.1	Offline Files.....	241
7.1.1	Offline Files and server configuration.....	244
7.1.2	Managing the offline file cache.....	245
7.2	Tablet PC Features	248
7.2.1	Tablet PC Input Panel	248
7.2.2	Pen Flicks.....	249
7.2.3	Calibration Tool	249
7.3	Mobile Device Center.....	250
8	Migrating to Windows Vista	251
8.1	(Roaming) Profiles	251
8.1.1	What's new in Windows Vista User Profiles	251
8.1.2	Profile types in Windows Vista.....	256
8.1.3	User profile compatibility	258
8.2	Application Compatibility	259
8.2.1	Marking application compatibility in the UI.....	260
8.2.2	The Application Compatibility Database	262
8.3	User State Migration.....	264
8.3.1	Windows Easy Transfer	264
8.3.2	User State Migration Tool (USMT) 3.0	265
	Index	267
